Attorney General John Ashcroft
US Department of Justice
Washington, DC 20530-0001

Dear Mr. Ashcroft:

Thanks for the effort and direction that you and your departments are taking. My family and I approve of the leadership and wisdom that the Bush administration is taking.

It is my understanding that Microsoft and the government have settled an antitrust lawsuit in which Microsoft has agreed to grant computer makers broad new rights to configure Windows so as to promote non-Microsoft software programs that compete with with programs included within Windows. In my opinion, no more federal litigation against Microsoft is acceptable beyond this agreement.

Sincerely,

William R. Park
